

ONE Grounds Management

is positioned to become one of the top U.S. companies in the large and diversified U.S. landscaping service sector. ONE GM is currently a strong national company and is poised to grow significantly in many areas during next five years with strategic acquisitions, increased RFP performance, software development, and aggressive sales goals and marketing. Taking advantage of industry consolidation, increasing demand, and industry growth, ONE GM has experienced rapid growth and is projected to continue to grow in the next five years. We are seeking those who can help us fulfill our vision for growth and be an influence for good in their communities.

ONE GM GROWTH

ONE Grounds Management is seeking to partner with new facility managers who understand the value of a regional commercial landscaping company. We seek to meet FMs who can truly benefit from a company that will take care of ALL aspects of grounds maintenance and all quality controls, inspections, crew operations, and documentation. We are looking for new opportunities to submit proposals. Let us come and introduce our team.

ONE Grounds Management Growth Plan

One GM has identified growth opportunities with business hubs across the United States.

In addition to centralized hubs we can expand our service reach with our effective service partner model.

Working together with smaller companies allows us to train, manage, and assist these companies in the efficient execution of grounds management across areas much larger than they could service alone. This creates opportunities for smaller companies to work on larger contracts, it allows them to utilize our proprietary software to plan, service, and document each visit, and it gives them faster growth.

For ONE Grounds having a smart combination of in-house management and crews, along with excellent service partners means we can assure quality and consistency across the United States.
